You don't buy DoDonPachi Resurrection to play the game. You buy it so you can buy this album.. Jake Kaufman, mostly known for his work at Wayforward, really got to show his stuff with this OST. Mixing elements both from the original BLACK LABEL OST along with Ketsui's own, bounded together with Jake's own brand of Rythem makes this a winner in every possible way. Buying this itself doesn't 'add' anything towards your copy of the game mind you, but it does give you the OST in both MP3 (320kbps\44100Hz) and FLAC for your music player of choice to enjoy these tracks outside of playing the game.
